

College & University Services

Inspirame, an equity-driven education technology company focused on bridging the gap between learners, schools, & the workforce.

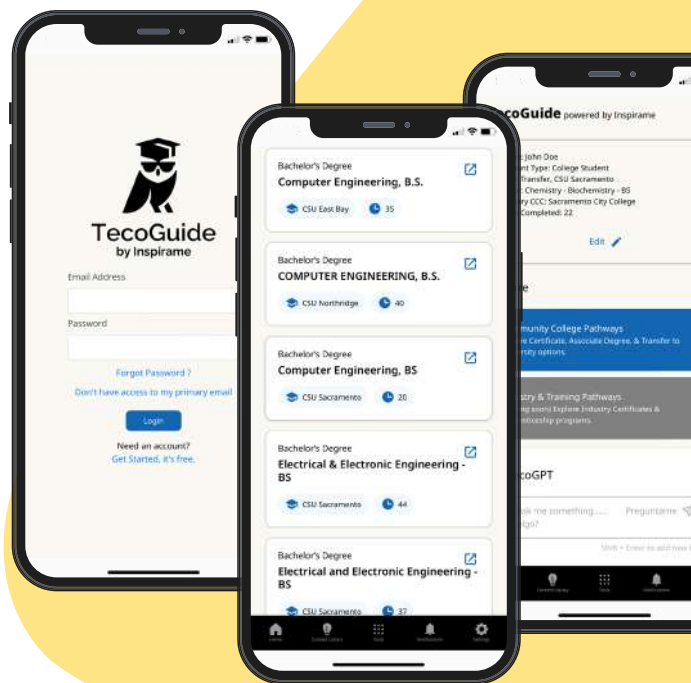

The Opportunity

The California Community Colleges, the California State Universities, and the University of California system collectively comprise the **largest** community college and university network in the United States. Despite their size and scope, all three systems struggle with low-rates of student completion and transfer. Fundamentally, many students lack awareness of accessible educational pathways, degree requirements, and essential college-survival skills.

The Solution : Meet *TecoGuide*

Inspirame's **TecoGuide** mobile app effectively tackles **unawareness** by exposing and guiding learners to affordable educational pathways with a special focus on **transferring** from a CA Community College to a 4-year university. By teaching and guiding learners through academic and career pathways, **TecoGuide** aims to increase college & university enrollment and transfer-rates, while shortening time-to-degree completion rates. **TecoGuide** features include:

TecoGPT | Classes | Ed Planner | Majors | Content Library

Core Benefits

Exposure

CCC, CSU, UC Academic Pathways
College-Survival Knowledge
Career & Skills Transferability
Growth Mindset & Decision Making

Academic Guidance

TecoGuide is customizable and offers resources to learners to personalize their education and career pathways.

No Integration Required

Data & Solutions

Longitudinal data analysis and customizable reporting for comprehensive learner Insights.

No College IT Resources Needed
